

HUMBOLDT-UNIVERSITÄT ZU BERLIN

Final report about utilizing the
Android OpenGL
capabilities for designing
graphical user interfaces

Rainer Rehak
Dr. rer. nat. Wolf Müller
Prof. Dr. rer. nat. Jens-Peter Redlich
HUMBOLDT-UNIVERSITÄT ZU BERLIN
COMPUTER SCIENCE DEPARTMENT
Systems Architecture Group

Table of contents

1. Summary of Tasks and Goals.....	4
2. Technology Background.....	4
2.1. Overview of the Android platform	4
2.2. Google Android and its SDK.....	5
3. Android-GUI.....	6
3.1. Graphics API and philosophy.....	6
3.2. Graphics Architecture.....	6
3.3. Using OpenGL in a view.....	7
3.4. Problems of proposed solution & alternative approaches.....	8
4. Existing GUI elements and tutorial.....	8
4.1. How do they look and how are they used.....	8
4.2. How are they programmed?.....	9
4.3. Technical details – energy consumption and performance issues.....	11
5. Practical Examples – GUI rendering capabilities in innovative applications.....	12
5.1. Android developer's challenge.....	12
5.2. Discussion of new/innovative GUI elements.....	15
6. Android SDK versions and upgrade strategies.....	16
7. Results and conclusion.....	16
7.1. Summary of what we have done.....	16
7.2. Summary of what we have learned from doing that.....	17
7.3. Future outlook.....	17
8. Appendix.....	18
8.1. Our development environment.....	18
8.2. Source code – files and instructions how to use/install.....	18
